

I cannot see how allowing a company like Sinclair Broadcasting to demand that their stations air an undisputably partsian program like the anti-Kerry program they have planned this month can be a good thing for America. Obviously this company has a partisan agenda, and by using the airwaves that we tax payers own to broadcast this message free of charge is repulsive. This company is creating it's own news and then pretending to report on it. If there was ever a reason to limit the power of media this is it.

Sincerely,

Andy Wright
